Smooth sailing in rough waters

Taaleri's Q2 results were largely in line with our expectations on group key figures, although we note that there were pronounced deviations on the segment level, especially in Garantia and Investments. Continuing earnings (EUR 9.8m) came in slightly below our expectation (EUR 10.5m), marking an 8% y/y decline. Segment EBIT of EUR 4.4m was 4% below our estimate, which was explained by negative performance fees in Renewable Energy and negative fair value changes in Investments but balanced by exceptionally strong performance in Garantia. Following our estimate revisions, our SOTP-based fair value range decreases slightly to EUR 8.4-9.4 (8.5-9.6).

Q2 imperfections balanced out

Taaleri's Q2 continuing earnings of EUR 9.8m declined by 8% y/y, coming in 7% below our estimate. The y/y miss relative to our estimate was mainly driven by Garantia's continuing earnings (up 24% y/y but 22% below our estimate). In Private Asset Management, continuing earnings were in line with our expectation, as SW3-related catch-up fees meant a tough y/y comparison. Garantia's insurance revenue declined by 2% y/y, but operating profit (EUR 9.8m) clearly beat our forecast of EUR 4.9m. During Q2, Garantia booked EUR 8.6m of positive investment income, compared to our estimate of EUR 3.4m. On the other hand, Garantia's combined ratio was slightly higher than we had expected, at 36.7% (our estimate: 27.9%; Q1: 21.8%), which pushed its continuing earnings below our estimate. Despite the segment variations, overall results were largely in line with our expectations.

Outlook intact

While the Q2 report can be described as somewhat mixed, group figures did come in largely in line with our estimates. During the results presentation, we were pleased to hear more details about Fintoil and the prospects for the investment. We note that Fintoil is set to play a more prominent role in Taaleri's Investments segment from Q3 onwards as the financing arrangement is finalised. The outlook for key segments remains unchanged, with the SW4 fund targeting first close in the next 12 months, in line with our estimate. We cut our 2026-27 adjusted EBIT estimates by 3-6%, mainly reflecting the impact of fair value changes in the Investments segment.

Fair value of EUR 8.4-9.4 per share

Following our revised estimates, we derive a slightly lower SOTP-based fair value range of EUR 8.4-9.4 (8.5-9.6). Our lower fair value range mainly reflects slightly lower profitability in Private Asset Management for 2026E. We note that Garantia corresponds to EUR 6.2-6.9 per share in our valuation framework.

Valuation

We calculate a slightly lower SOTP-derived fair value range of EUR 8.4-9.4 (8.5-9.6) per Taaleri share. We use peer group multiples to value Taaleri's private equity business. Owing to our solid and stable outlook for Garantia, we also use a dividend discount model to value the guarantee insurance part of Taaleri. We derive two different peer groups: one for renewable energy and another for private asset management.

SOTP valuation yields a fair value range of EUR 8.4-9.4

We believe that a SOTP valuation is most relevant for Taaleri. We use different valuation methods for the company's Private Asset Management business, Investments and Garantia, owing to their different characteristics. We believe peer multiples are the logical means of valuing the company's Private Asset Management business, despite it being in a ramp-up phase; meanwhile, we are inclined to use a dividend discount model to value Garantia, owing to its stable business model and fairly stable dividend outlook. We do not believe a traditional DCF-based valuation is suitable for Taaleri, given its high dependence on unannounced funds.

Two peer groups for Taaleri: renewable energy and private asset management

We use two different peer groups for Taaleri – one for renewable energy and another for other private asset management. Although Taaleri has multiple Finnish peers, we are hesitant to use a broad peer group, as there is insufficient coverage of these names. Hence, our peer group for other private asset management consists of three companies. For renewable energy, we use a broader peer group of European asset managers and companies exposed to renewable energy infrastructure. Our peer group for renewable energy consists of eight European companies.

SOTP valuation

We account for the net debt position, minority interests, time value and dividends to reach a fair value range of EUR 8.4-9.4 (8.5-9.6)

We continue to assign a 7-9x EV/EBIT multiple for Other Private Asset Management and the Other segment. For Investments, we use the most recent reported fair value (as of Q2 2026) in its entirety, and we use a range of $\pm 10\%$. We use peer multiples (9-11x) for the Renewable Energy subdivision (excluding performance fees and investments) and 4-6x for performance fees.

Owing to our generally stable outlook for Garantia, we use a DDM model and assume that Garantia could pay all of its profits to Taaleri. We model EUR 16m in dividends from Garantia to Taaleri for 2026, after which we expect a 1.5-2.5% annual dividend increase in the terminal value. We use a 10.3% cost of equity as a discount factor. Based on this approach, we calculate a fair value range of EUR 174-195m for Garantia. Garantia proposed a dividend of EUR 18m in 2025, which we note is higher than what we expect to be paid for 2026.

We account for the net debt position, minority interests, time value and dividends to reach a fair value range of EUR 8.4-9.4 (8.5-9.6).

Main risks

Below, we list the main risk factors that we find relevant for Taaleri. The purpose of this section is not to provide a comprehensive list of all of the risks that the company may be subject to, but to instead highlight those that we find most relevant. The main risks we identify relate to the overall economic situation, as we argue that this will have implications for the funds and Garantia.

A slowdown in economic activity could hamper Taaleri's performance	General economy Taaleri has benefitted from a favourable macroeconomic environment, combined with low interest rates, which has supported housing prices and hence Garantia's business. Demand for alternative investments has also fared well in the positive market environment. In the event of an economic slowdown, the performance of Garantia and fund companies could be negatively affected. Changes in the market environment could affect Taaleri's ability to raise fund commitments, and a slowing transaction market could hinder its ability to make new investments and exit assets, in our view.
A cooling of the housing market could negatively affect the real estate operations	Housing market The positive development in the Finnish housing market has benefitted Garantia through high housing market activity, while Taaleri's housing funds have benefitted from lower yield requirements. If the housing transaction market were to cool down, Taaleri's operations in Garantia and real estate funds could be negatively affected.
Low interest rates have supported alternative investments	Interest rates Low interest rates have supported Taaleri's business through low financing costs and easy funding access. If interest rates were to rise, the availability of funding could become more difficult. Higher interest rates could also hamper the valuation of investments and the project pipeline.
Key personnel are important for customer relationships	Key personnel As Taaleri is a financial player, key personnel play a crucial role in its customer relationships. If any key personnel were to leave the company, there could be a risk of customer outflow from Taaleri's funds.
A competitive sales channel plays a crucial role for Taaleri	Sales channels Taaleri decided to terminate its cooperation agreement with Aktia in June 2025, with regards to the sale of its funds. To reach targeted fund sizes, Taaleri is ramping up its in-house institutional sales channel. If the company cannot ramp up its institutional sales channel and/or if it fails to secure a new cooperation agreement, the asset management division's performance could be negatively affected through lower AuM.
Overall economic activity could affect investment values	Investments Taaleri has around EUR 30m in non-strategic investments that it aims to divest. The market value of these investments could vary greatly depending on the general economic situation.
If not executed well, M&A activity may increase costs	Potential M&A After divesting its wealth management arm, Taaleri has an overcapitalised balance sheet. M&A could increase costs temporarily or even in the longer term in a worst-case scenario, if acquisitions were to fail or their integration were to be executed poorly. It is therefore important for the company to maintain good cost control and clear M&A execution plans, so as not to hamper earnings.
A tightening competitive environment could hamper Taaleri's growth prospects	Competitive environment If the competitive environment regarding alternative investments were to intensify, this could hamper Taaleri's growth and earnings through lower management fees and hinder the company's ability to find investments.

Disclaimer and legal disclosures

Origin of the publication or report

This publication or report originates from: Nordea Bank Abp, including its branches Nordea Danmark, Filial af Nordea Bank Abp, Finland, Nordea Bank Abp, filial i Norge and Nordea Bank Abp, filial i Sverige (together "Nordea") acting through their units Nordea Markets and Equity Sales & Research.

Nordea Bank Abp is supervised by the European Central Bank and the Finnish Financial Supervisory Authority and the branches are supervised by the European Central Bank and the Finnish Financial Supervisory Authority and the Financial Supervisory Authorities in their respective countries.

Content of the publication or report

This publication or report has been prepared solely by Nordea Markets or Equity Sales & Research.

Opinions or suggestions from Nordea credit and equity research may deviate from one another or from recommendations or opinions presented by other departments in Nordea. This may typically be the result of differing time horizons, methodologies, contexts or other factors.

Investment opinions, ratings, recommendations and target prices are based on one or more methods of valuation, for instance cash flow analysis, use of multiples, behavioural technical analyses of underlying market movements in combination with considerations of the market situation and the time horizon. Key assumptions of forecasts, ratings, recommendations, target prices and projections in research cited or reproduced appear in the research material from the named sources. The date of publication appears from the research material cited or reproduced. Opinions and estimates may be updated in subsequent versions of the publication or report, provided that the relevant company/issuer is treated anew in such later versions of the publication or report.

Validity of the publication or report

All opinions and estimates in this publication or report are, regardless of source, given in good faith, and may only be valid as of the stated date of this publication or report and are subject to change without notice.

No individual investment or tax advice

The publication or report is intended only to provide general and preliminary information to investors and shall not be construed as the basis for any investment decision. This publication or report has been prepared by Nordea Markets or Equity Sales & Research as general information for private use of investors to whom the publication or report has been distributed, but it is not intended as a personal recommendation of particular financial instruments or strategies and thus it does not provide individually tailored investment advice, and does not take into account the individual investor's particular financial situation, existing holdings or liabilities, investment knowledge and experience, investment objective and horizon or risk profile and preferences. The investor must particularly ensure the suitability of an investment as regards his/her financial and fiscal situation and investment objectives. The investor bears the risk of losses in connection with an investment.

Before acting on any information in this publication or report, it is recommendable to consult one's financial advisor. The information contained in this publication or report does not constitute advice on the tax consequences of making any particular investment decision. Each investor shall make his/her own appraisal of the tax and other financial merits of his/her investment.

Sources

This publication or report may be based on or contain information, such as opinions, recommendations, estimates, price targets and valuations which emanate from: Nordea Markets' or Equity Sales & Research analysts or representatives, publicly available information, information from other units of Nordea, or other named sources. To the extent this publication or report is based on or contain information emanating from other sources ("Other Sources") than Nordea Markets or Equity Sales & Research ("External Information"), Nordea Markets or Equity Sales & Research has deemed the Other Sources to be reliable but neither Nordea, others associated or affiliated with Nordea nor any other person, do guarantee the accuracy, adequacy or completeness of the External Information.

The perception of opinions or recommendations such as Buy or Sell or similar expressions may vary and the definition is therefore shown in the research material or on the website of each named source.

Limitation of liability

Nordea or other associated and affiliated companies assume no liability as regards to any investment, divestment or retention decision taken by the investor on the basis of this publication or report. In no event will Nordea or other associated and affiliated companies be liable for direct, indirect or incidental, special or consequential damages resulting from the information in this publication or report.

Risk information

The risk of investing in certain financial instruments, including those mentioned in this document, is generally high, as their market value is exposed to a lot of different factors such as the operational and financial conditions of the relevant company, growth prospects, change in interest rates, the economic and political environment, foreign exchange rates, shifts in market sentiments etc. Where an investment or security is denominated in a different currency to the investor's currency of reference, changes in rates of exchange may have an adverse effect on the value, price or income of or from that investment to the investor. Past performance is not a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. When investing in individual shares, the investor may lose all or part of the investments.

Conflicts of interest

Nordea, affiliates or staff in Nordea, may perform services for, solicit business from, hold long or short positions in, or otherwise be interested in the investments (including derivatives) of any company mentioned in the publication or report.

To limit possible conflicts of interest and counter the abuse of inside knowledge, the analysts of Nordea Markets and Equity Sales & Research are subject to internal rules on sound ethical conduct, the management of inside information, handling of unpublished research material, contact with other units of Nordea and personal account dealing. The internal rules have been prepared in accordance with applicable legislation and relevant industry standards. The object of the internal rules is for example to ensure that no analyst will abuse or cause others to abuse confidential information. It is the policy of Nordea that no link exists between revenues from capital markets activities and individual analyst remuneration. Nordea and the branches are members of national stockbrokers' associations in each of the countries in which Nordea has head offices. Internal rules have been developed in accordance with recommendations issued by the stockbrokers associations. This material has been prepared following the Nordea Conflict of Interest Policy, which may be viewed at www.nordea.com/mifid.

Please find a list of all recommendations disseminated by Nordea Equities during the preceding 12-month period here: <https://research.nordea.com/compliance>

Distribution restrictions

The securities referred to in this publication or report may not be eligible for sale in some jurisdictions. This research report is not intended for, and must not be distributed to private customers in the UK or the US or to customers in any other jurisdiction where restrictions may apply.

This research report has not been prepared for distribution outside the EU, the UK or the US. The content of this research report is not a product disclosure statement or other regulated document for the purposes of the Australian Corporations Act 2001 (CTH). The distribution of this research report in Australia has not been authorised by any regulatory authority in Australia, and Nordea Bank Abp is not licensed by the Australian Securities and Investment Commission to provide financial services in Australia.

This publication or report may be distributed in the UK to institutional investors by Nordea Bank Abp London Branch of 6th Floor, 5 Aldermanbury Square, London, EC2V 7AZ, which is under supervision of the European Central Bank, Finanssivalvonta (Financial Supervisory Authority) in Finland and subject to limited regulation by the Financial Conduct Authority and Prudential Regulation Authority in the UK. Details about the extent of our regulation by the Financial Conduct Authority and Prudential Regulation Authority are available upon request.

Nordea Bank Abp ("Nordea") research is not "globally branded" research. Nordea research reports are intended for distribution in the US solely to "major U.S. institutional investors," as defined in Rule 15a-6 under the Securities Exchange Act of 1934. Any transactions with US institutional investors in securities discussed within the research reports will be chaperoned by Nordea Securities LLC ("Nordea Securities"), an affiliate of Nordea and a SEC registered broker dealer and member of FINRA. Nordea Securities does not employ research analysts and has no contractual relationship with Nordea that is reasonably likely to inform the content of Nordea research reports. Nordea makes all research content determinations without any input from Nordea Securities.

The research analyst(s) named on this report are not registered/qualified as research analysts with FINRA. Such research analyst(s) are also not registered with Nordea Securities and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

This publication is provided for the sole use of the intended recipient and may not be reproduced, distributed, or used, in whole or in part, including in any artificial intelligence or large language model, whether public or private, without the prior written consent of Nordea Markets and Equity Sales & Research, under applicable copyright laws.

Fair value and sensitivity

We calculate our fair values by weighting DCF, DDM, SOTP, asset-based and other standard valuation methods. Our fair values are sensitive to changes in valuation assumptions, of which growth, margins, tax rates, working capital ratios, investment-to-sales ratios and cost of capital are typically the most sensitive.

It should be noted that our fair values would change by a disproportionate factor if changes are made to any or all valuation assumptions, owing to the non-linear nature of the standard valuation models applied (mentioned above). As a consequence of the standard valuation models we apply, changes of 1-2 percentage points in any single valuation assumption can change the derived fair value by as much as 30% or more. All research is produced on an ad hoc basis and will be updated when the circumstances require it.

Marketing material

This research report should be considered marketing material, as it has been commissioned and paid for by the subject company, and has not been prepared in accordance with the regulations designed to promote the independence of investment research and it is not subject to any legal prohibition on dealing ahead of the dissemination of the report. However, Nordea Markets analysts are according to internal policies not allowed to hold shares in the companies/sectors that they cover.

Analyst Shareholding

Nordea analysts do not hold shares in the companies that they cover. No holdings or other affiliations by analysts or associates.

Previous rating changes in the past 12 months

Date	To	From
No rating changes		

Distribution of recommendations

Recommendation	% distribution
Buy	63.67%
Hold	31.14%
Sell	5.19%

As of 10 August 2026

Recommendation structure and fair value sensitivity (absolute ratings)

Buy:	Positive share price potential versus our fair value and we see a compelling investment case to buy the share.
Sell:	Negative share price potential versus our fair value and we see a compelling investment case to sell the share.
Hold:	Share in line with our fair value and/or no compelling investment case.

We calculate our fair values by weighting DCF, DDM, SOTP, asset-based and other standard valuation methods. When applicable, we set a 12-month target price by applying an appropriate premium/discount and/or other relevant adjustment to our fair value to reflect the share price potential we see within the coming 12 months. Our fair values are sensitive to changes in valuation assumptions, of which growth, margins, tax rates, working capital ratios, investment-to-sales ratios and cost of capital are typically the most sensitive.

It should be noted that our fair values would change by a disproportionate factor if changes are made to any or all valuation assumptions, owing to the non-linear nature of the standard valuation models applied (mentioned above). As a consequence of the standard valuation models we apply, changes of 1-2 percentage points in any single valuation assumption can change the derived fair value by as much as 30% or more. Dividend payouts are included in the target price. All research is produced on an ad hoc basis and will be updated when the circumstances require it.

Nordea ESG rating methodology

Market-making obligations and other significant financial interest

Nordea has no market-making obligations in Taaleri shares.

As of today, Nordea Abp holds no positions of 0.5% or more of shares issued by Taaleri.

As of the publication of this report, the issuer does not hold a position exceeding 5% of the total shares issued in Nordea Abp.

Investment banking transactions and/or services

In view of Nordea's position in its markets, readers should assume that the bank may currently or may in the coming three months and beyond be providing or seeking to provide confidential investment banking and/or ancillary services to the company/companies.

Distribution of recommendations (transactions)*

Recommendation	% distribution
Buy	67.47%
Hold	27.71%
Sell	4.82%

As of 10 August 2026

* Companies under coverage with which Nordea has ongoing or completed public investment banking transactions.

Equity risk rating

Nordea risk rating: Taaleri

4

As a measure of the company's operational risk we, apply a risk rating scale of 1-5 where 1 is the lowest risk and 5 is the highest. The risk rating is calculated using a weighted average of earnings/cash flow predictability, earnings quality and backwardlooking asset beta. For the most illiquid stocks, the risk rating is also adjusted for liquidity risk. The risk rating is then converted to asset beta and used to calculate the cost of capital. It is thus implicitly included in our fair value calculations.
