## Commissioned research: Raketech Group Holding – No major surprises

Marketing material commissioned by Raketech Group Holding

**Raketech just released a somewhat soft Q2 report, and a decent start to Q3. Revenues came in in-line at EUR 11.3m (NDA: EUR 11.4m), with a revenue organic growth of -4% (NDA: -4%). The adj. EBITDA came in 8% soft (EUR 4.0m vs NDA EU 4.3m), corresponding to a adj. EBITDA margin of 35% (NDA 37.5%), a deviation explained by higher cost base than expected, as Raketech continues to invest heavily in future growth. The US market now represent 12% of group revenues as activity dropped during Q2, expected to accelerate growth as activity will pick up throughout the third quarter, we argue. The management reiterate its 2022 guidance of revenues in the higher interval of EUR 50-55m for (NDA: EUR 52.1m), with an 2022 EBITDA margin in the lower interval of 40-44% (NDA: 40.6%).**

### Trading update

A decent start to the third quarter with daily average revenues in July of EUR 0.126m, 9% below NDA full Q3'22 average revenue estimate of EUR 0.139m. However, as we expect activity levels to increase throughout the third quarter with sporting leagues starting, we argue that the start to Q3 is decent and hence do not expect to make any significant estimate changes. Instead, minor negative estimate revisions of 1-2% is motivated on back of the slightly soft Q2 numbers, with a similar share price reaction. Cc to follow at 09.00 CET

- **EBITDA margin :** 35% vs NDA 37.5%

**Analyst Shareholding**

Nordea Markets analysts do not hold shares in the companies that they cover. No holdings or other affiliations by analysts or associates.

**Fair value and sensitivity**

We calculate our fair values by weighting DCF, DDM, SOTP, asset-based and other standard valuation methods. Our fair values are sensitive to changes in valuation assumptions, of which growth, margins, tax rates, working capital ratios, investment-to-sales ratios and cost of capital are typically the most sensitive. It should be noted that our fair values would change by a disproportionate factor if changes are made to any or all valuation assumptions, owing to the non-linear nature of the standard valuation models applied (mentioned above). As a consequence of the standard valuation models we apply, changes of 1-2 percentage points in any single valuation assumption can change the derived fair value by as much as 30% or more. All research is produced on an ad hoc basis and will be updated when the circumstances require it.

**Marketing material**

This research report should be considered marketing material, as it has been commissioned and paid for by the subject company, and has not been prepared in accordance with the regulations designed to promote the independence of investment research and it is not subject to any legal prohibition on dealing ahead of the dissemination of the report.
