Commissioned research: Suominen – Q2 comparable EBITDA of EUR 2.7m misses expectations, but guidance continues to suggest improving earnings in H2

Marketing material commissioned by Suominen

Suominen reported slightly lower comparable EBITDA than expected, but reiterated its guidance for improving earnings in 2023 vs 2022, which also implies earnings improvement in H2 compared to H1. Cash flow of EUR 6m was boosted by release in working capital. We anticipate consensus estimates to decline from the current EUR 28m, but continue to foresee earnings momentum to improve from the low levels in H1.

Q2 comparable EBITDA of EUR 2.7m, H2 earnings guided to improve from H1

- Suominen's Q2 23 comparable EBITDA amounted to EUR 2.7m (consensus by Vara EUR 4.3m), at sales of EUR 113m (consensus EUR 120m). Reported EBITDA was EUR -1.9m.
- Cash flow from operations in April–June was EUR 6.4m (11.9m), as the change in working capital contributed EUR 9.0m to cash flow. Suominen claims it was able to release cash from inventories and receivables. Management indicates that Q2 was operationally slightly better than Q1.
- Guidance for 2023 remained unchanged, as management foresees comparable EBITDA to increase in 2023 from EUR 15m in 2022. H1 2023 EBITDA amounted to EUR 5.3m, slightly ahead of EUR 5.2m in H1 2022, and guidance implies better earnings momentum in H2, which is also incorporated in consensus 2023 EBITDA expectation of EUR 28m.

Fair value and sensitivity

We calculate our fair values by weighting DCF, DDM, SOTP, asset-based and other standard valuation methods. Our fair values are sensitive to changes in valuation assumptions, of which growth, margins, tax rates, working capital ratios, investment-to-sales ratios and cost of capital are typically the most sensitive. It should be noted that our fair values would change by a disproportionate factor if changes are made to any or all valuation assumptions, owing to the non-linear nature of the standard valuation models applied (mentioned above). As a consequence of the standard valuation models we apply, changes of 1-2 percentage points in any single valuation assumption can change the derived fair value by as much as 30% or more. All research is produced on an ad hoc basis and will be updated when the circumstances require it.

Marketing material

This research report should be considered marketing material, as it has been commissioned and paid for by the subject company, and has not been prepared in accordance with the regulations designed to promote the independence of investment research and it is not subject to any legal prohibition on dealing ahead of the dissemination of the report.
