## Commissioned research: Føroya Banki – Systemic risk buffer to be lifted by 1pp

Marketing material commissioned by Føroya Banki

The Danish Systemic Risk Council recommends that the Faroe systemic risk buffer is hiked to 3% (currently 2%) from 1 July 2025. Prior to the COVID pandemic this was on the table as well. Due to the pandemic, it was however reduced to 2% shortly after the implementation. In December 2021, the Systemic Risk Council recommended to implement a countercyclical buffer at 1% instead of raising the systemic risk buffer by 1pp. Now the Systemic Risk Council has changed its stance once again and opt for both. Adding 1pp to the CET1 requirement of Føroya Banki, reduces the capital distribution potential by DKK ~80m on our estimates, which corresponds to ~5% of its market cap. We are also still waiting for the outcome of the ongoing investigation by the Danish FSA regarding the Faroese and Greenlandic property markets, which has posed a temporary hiccup in Føroya Banki's capital optimisation journey. We expect to see the outcome of this during Q3 2024.

#### **Analyst Shareholding**

Nordea Markets analysts do not hold shares in the companies that they cover. No holdings or other affiliations by analysts or associates.

#### **Fair value and sensitivity**

We calculate our fair values by weighting DCF, DDM, SOTP, asset-based and other standard valuation methods. Our fair values are sensitive to changes in valuation assumptions, of which growth, margins, tax rates, working capital ratios, investment-to-sales ratios and cost of capital are typically the most sensitive.

It should be noted that our fair values would change by a disproportionate factor if changes are made to any or all valuation assumptions, owing to the non-linear nature of the standard valuation models applied (mentioned above). As a consequence of the standard valuation models we apply, changes of 1-2 percentage points in any single valuation assumption can change the derived fair value by as much as 30% or more. All research is produced on an ad hoc basis and will be updated when the circumstances require it.

#### **Marketing material**

This research report should be considered marketing material, as it has been commissioned and paid for by the subject company, and has not been prepared in accordance with the regulations designed to promote the independence of investment research and it is not subject to any legal prohibition on dealing ahead of the dissemination of the report.
